

Patients Contribution to Case Notes (PCCN general)

Our patients are a member of the team

Patients note keeping diary

This document is intended for you to share your own feelings and views on your own progress while admitted to the hospital. It is meant to give you time to document your thoughts at your own pace.

The diary is meant to enhance your positive experience by giving you a platform that allows you more control on your own health and any decisions taken about you by healthcare staff.

The diary aims to concentrate on areas that are of importance to you. It is divided into the following headings in general:

1. A summary of your journey from the time of your referral to diagnosis, tests done and clinic visit outcome. This is a page length for you to share your feelings about your journey up and until the time of your admission.
2. Your daily progress in your own words.
3. Any issues or concerns you want to address about your care
4. What you need to do to enhance your recovery.

We aim for this diary to be part of daily ward round where nurses and doctors read and act on what is important to you as written in your diary. We hope to get you very much engaged in your own treatment by actively participating in this diary. This will help us too improving the way we provide service to our patients.

Sincerely
The team

Please share with us your feelings and experience from the time of referral by your doctor through to tests and clinic visits up to your date of admission to hospital today.

Day1: Date:

Name:

Below is what I understand about my progress so far:

I need to know the following about my own progress:

I have the following issues/concerns to discuss with nursing/medical staff:

Below is what I need to do today to make my recovery faster

Day 2 : Date:

Name:

Below is what I understand about my progress so far:

I need to know the following about my own progress:

I have the following issues/concerns to discuss with nursing/medical staff:

Below is what I need to do today to make my recovery faster

Day 3: Date:

Name:

Below is what I understand about my progress so far:

I need to know the following about my own progress:

I have the following issues/concerns to discuss with nursing/medical staff:

Below is what I need to do today to make my recovery faster

Day 4: Date:

Name:

Below is what I understand about my progress so far:

I need to know the following about my own progress:

I have the following issues/concerns to discuss with nursing/medical staff:

Below is what I need to do today to make my recovery faster

Day 5 : Date:

Name:

Below is what I understand about my progress so far:

I need to know the following about my own progress:

I have the following issues/concerns to discuss with nursing/medical staff:

Below is what I need to do today to make my recovery faster

Day 6: Date:

Name:

Below is what I understand about my progress so far:

I need to know the following about my own progress:

I have the following issues/concerns to discuss with nursing/medical staff:

Below is what I need to do today to make my recovery faster

Day 7: Date:

Name:

Below is what I understand about my progress so far:

I need to know the following about my own progress:

I have the following issues/concerns to discuss with nursing/medical staff:

Below is what I need to do today to make my recovery faster

Day 8: Date:

Name:

Below is what I understand about my progress so far:

I need to know the following about my own progress:

I have the following issues/concerns to discuss with nursing/medical staff:

Below is what I need to do today to make my recovery faster

If you believe there are further questions to add to the diary that could help improve this work please feel free to suggest them on this page

How did you find the diary?

Was it useful?
