

Coronavirus:

Neonatal Unit Visiting Guidance

Please kindly note the following visiting arrangements within the neonatal unit:

- Masks should be worn by parents on the unit
- Masks may be removed for short periods at the cot side where parents are able to socially distance by 2 meters from staff and other parents/cots
- Parents are asked to remain by the cot side as much as possible and will be asked to leave the room when other infants are being examined on the ward round
- Frequent handwashing should be maintained
- Please inform the nurse immediately if you are resident with your child and you develop any of the symptoms of coronavirus
- Parents and carers are asked to perform a minimum of twice weekly lateral flow tests and inform the nurse coordinator of the result

Please kindly note this advice has been issued in response to the current Covid-19 guidance to minimise transmission of the virus further and will be reviewed in due course.

You can discuss arrangements with the nurse in charge/ward manager or matron if you wish.
